

Clients

Our in-depth market understanding assist us in efficiently catering to the ever changing needs of clients. Further, our better understanding of human rights helps in dealing with full honesty, integrity and openness. This has provided us a reputation in the global spectrum. It is the superior quality of our products, their competitive prices and timely delivery that also attract customers to deal with us .Presently we are working with the following companies.

- GAUGES BOURDON PVT. LTD.
- GENERAL INSTRUMENTS PVT. LTD.
- GRINDWELL NORTON LTD.
- NESSTECH INSTRUMENTS PVT. LTD
- BAUMAR TECHNOLOGES INDIA PVT. LTD.
- C & M FARMING LTD.
- FORBES MARSHALL (HYD) PVT. LTD.

Our Company

Soham Enterprises is one of the leading rubber manufacturing company in India (SSI Regd.) established by Mr. Santosh Surve in the year 2011. We are a professionally organized team, backed by high proficient engineers and technicians. Their valuable industry experience and technical knowledge assist us in understanding market requirement and to manufacture an unmatched range of rubber components for customers.

We are engaged in the manufacturing and supply of wide range of custom rubber components. We are an ISO 9001:2008 company catering to the application needs of automobile, electrical, food, pharmaceuticals and other engineering industries. We offer silicon rubber products, rubber molded articles, anti vibration pads and rubber seals. We are committed to consistently supply Rubber Products which satisfy our customer's requirement in respect of product quality and delivery by continuous improvement in Method, Resources, Employee Skill and Work Environment.

Products Offered

We manufacture a wide assortment of molded rubber components by utilizing both natural as well as synthetic rubber. These product feature high strength, durability and flame retardant nature. Known for dimensional accuracy, each rubber component is ensured to be made in compliance with laid industry standards.

The range we offer is categorized as:

- Silicon Rubber Products
- Rubber Moulded Articles
- Anti Vibration Pads, 'O'ring, Bush, Bellow, Gasket, Rubber wahser, Seal, Diaphragm and Gromet.

Specific Features

Designed as per the unique requirement of clients, the range of rubber components we manufacture are known for their flawless quality and 100% performance under extreme conditions.

Some of the highlighting features of our product range are :

Raw Material Used

In order to assure superior quality of the rubber components and their high functionality rate, it is essential to use high grade raw material in the manufacturing process. All the raw material we use is procured from reliable vendors and suppliers in the market. Some of the materials involved in the production process include Natural, Nitrile, Viton, EPDM, Buna-n, SBR, Neoprene and Silicon.

Industrial Application

The precision engineered range of rubber products we manufacture are used in different industrial applications. Apart from extensively catering to the needs of automotive industry, our products are also used in:

- Engineering Industry
- Rubber Industry
- Oil and Gas Industry
- Pharmaceuticals
- Food Industry
- Electrical Industry
- Textile & Cement Industry
- Mechanical Industry
- Hospital & Medical Industry
- Electronics Engineering
- Chemical Industry

- Rubber Bellows
- Rubber Grommets
- Rubber O-Rings
- Rubber Bonded to Metal
- Solid Rubber Cords
- Silicone Rubber Products
- Anti Vibration Pads
- Rubber Bush
- Rubber Gaskets
- Rubber Washers
- Rubber Seal
- Rubber Diaphragm

Machinery

We have all hydraulic machinery and skilled labors.

Machine sizes- 14"-14" (2knots)
12"-12" (2knots)
10"-10" (2knots)
8"-8" (1knot)

Dies & Moulds

In house dies and moulds made by us as per the drawing. Material used for the same is (ss/ms/wps).
